

## Phone panels CU 25/4

unshielded, loaded with 25 RJ45 jacks, Category 3

Phone panel CU 25/4

### Descrizione

Unshielded 19"/1U phone panels for the transmission of digital (ISDN) and analogue voice signals.

Especially suitable for all Class C applications in accordance with EN 50173-1 and ISO/IEC 11801.

The patch panels support cables up to 50 pairs (telephone cables).

A maximum of four wires may be connected to one RJ45 socket. A termination aid is available as an optional accessory. This consists of two angular sheets that can easily be fixed to the frame or cabinet and make the cable termination more comfortable. For more accessories see below.
