

# EXTENDED ARTICLE NUMBERS

In 2017, Datwyler began to gradually extend the article numbers of its cables and other products from 6 to 10 digits. This extension provides our customers with important additional information. The first 6 digits show the “master number” of the articles.

The 9th letter indicates the main Euroclass (“reaction to fire” according to the CPR, European Construction Products Regulation No. 305/2011). The 8th digit stands for the additional classes. The 10th letter shows the packaging (cable length or packing unit).

## The key to the 10-digit article number:

**As a result of this extension some article numbers have been integrated into the new ones and some totally disappeared.**

**Note:**

Our cables are not available in any CPR classification and any length or packing unit (PU) mentioned above. Please refer to our website for the different versions on offer. Here you can also find the Declarations of Performance (DoP) as PDF files for download.
