

## CASE STUDY

# RATHBONES IN LONDON: A FORESIGHTED INVESTMENT

Rathbones has installed a shielded cabling system from Datwyler for its new premises in London. This gives the company maximum possible performance, even in the long term.

Rathbone Brothers Plc. are one of the UK's leading suppliers of high-quality, personalised investment and wealth management services for private investors, charities and trustees. It is Rathbone's declared objective to help clients "look forward with confidence".

This forward-thinking company recently specified a Datwyler structured cabling solution for its new offices near Liverpool Street in London, as it offered the maximum possible performance for long-term network support.

### Quality and security

Having specified the Datwyler solution for a previous site, Rathbones were already aware of the quality of the products and the security offered by the Datwyler 25 Year System Warranty.

Installation, which extended over five floors, took place between September 2016 and January 2017. It included nearly 140 kilometres of shielded Category 6<sub>A</sub> cable, with 2500 floor box outlets. Only angled patch panels were used in the network racks to give users simpler cable management and higher port density, as no additional patch lead management panels were required.

### Professional support

As the exclusive distributor of Datwyler cabling products in the UK and Ireland, iDaC Solutions worked closely with The Cabling Group, who delivered the installation, to ensure a smooth project rollout.

Graham Smith, Head of Account Management at The Cabling Group, had already worked on quite a number of projects with iDaC Solutions and the Datwyler systems.

"Rathbones was a fast track City fit-out, being undertaken across five high-end floor finishes. The IT cabling infrastructure was a Datwyler Category 6<sub>A</sub> SFTP solution that had to support the clients, LAN, Wireless, BMS and AV networks," is how Smith summed it up afterwards. "The pace of the project was challenging, but with the support of the iDaC and Datwyler teams, we never missed a deadline. The materials were always available and delivered when and where they were meant to, on time without fuss. The project and technical support throughout the project was first class, never a problem".
